

Subprocessor List

Provider Burnley Consulting, Inc. (myDesklog.com)

Current subprocessors

Vendor	Service / purpose	Data involved	Region / notes
Microsoft Azure	Cloud hosting, application infrastructure, storage, backup, and related platform services	Customer account data, deal data, support data, logs, and system metadata stored or processed as part of hosting the Service	Use your selected Azure region(s); describe production and backup regions if requested by customers
Stripe	Subscription billing and payment processing	Billing contact information, subscription transaction data, and payment method details collected through Stripe checkout components	Provider does not store full payment card details

Change management

- Add new subprocessors only after reasonable internal review of the provider's security and operational fit.
- Update this list when a subprocessor with access to customer data is added, removed, or materially changed.
- If your contracts promise customer notice or objection rights for new subprocessors, follow that process before the new subprocessor goes live.
